

Customize Ubuntu 22.04 LTS | 01

Video Tutorial

For more details watch video : https://www.youtube.com/watch?v=IXIb-1_H-mA

Initial Setup

Update ubuntu system :

```
sudo apt update && sudo apt upgrade -y
```

Install GNOME-Tweak :

```
sudo apt install gnome-tweaks
```

Integrate addons GNOME extensions

Download Resource

Download resource : <https://www.pling.com/p/1805660/>

Install GTK Theme

Download <https://github.com/vinceliuice/WhiteSur-gtk-theme>

```
./install.sh -t red
```

Install Icon Theme

Download <https://github.com/yeyushengfan258/Reversal-icon-theme>

```
./install.sh -red
```

Install Fonts

Download and Extract font to ~/.local/share/fonts

Install Cursors

Download <https://github.com/vinceliuice/Vimix-cursors>

Download and Extract, enter to directory Vimix-cursors:

```
./install.sh
```

Create folder ~/.icons. move folder ~/.local/share/icons/Vimix-cursors to ~/.icons

Install GNOME Extensions

Restore our GNOME Extensions backup

Extract extensions.zip then copy/move all gnome extensions inside folder extensions to ~/.local/share/gnome-shell/extensions

Install from extension.gnome.org

- User Themes : <https://extensions.gnome.org/extension/19/user-themes/>
- ArcMenu : <https://extensions.gnome.org/extension/3628/arcmenu/>
- Blur my Shell : <https://extensions.gnome.org/extension/3193/blur-my-shell/>
- Dash to Panel : <https://extensions.gnome.org/extension/1160/dash-to-panel/>
- GSConnect : <https://extensions.gnome.org/extension/1319/gconnect/>
- media-controls : <https://github.com/programmer-pony/media-controls>
- Coverflow Alt-Tab : <https://extensions.gnome.org/extension/97/coverflow-alt-tab/>
- Restore dconf - dconf load /org/gnome/shell/extensions/ < ~/.<backupfile>

Apply Themes, Icons, Fonts, Cursors

Open GNOME Tweaks Tools

Change Themes, Icons, Fonts, Cursors

Theme : Vimix-white-cursors

Icons : Reversal-red-dark

Shell : Whitesur-dark-solid-red

Legacy Applications : Whitesur-dark-solid-red

Fonts

Interface text : roboto regular – 10

Document text : roboto regular – 10

monospace text : Ubuntu mono regular 13

Legacy window title \: Roboot medium 11

Install Conky

```
sudo apt install conky-all curl jq moc
```

Extract conky_config.zip

Copy/move conky configuration **Graffias** to `~/config/conky/`

copy script startup **start_conky.desktop** to `~/config/autostart`

Apply Wallpaper

Copy image inside wallpapers_packs to `~/local/share/backgrounds`

Additional Setup

Connect WhiteSur theme to your Snap apps :

```
./tweaks.sh -s
```

Install Monterey Firefox theme :

```
./tweaks.sh -f monterey
```
